## Red China Sets Off 8th Nuclear Bomb

By George C. Wilson Washington Post Staff Writer

Communist China yesterday showed the world it is still intent on becoming a leading a dud. nuclear power by testing a three megaton H-bomb in the atmosphere.

Informed sources said this eighth Chinese test bomb was work as a weapon without fill- weapons. ing the atmosphere full of radioactive debris.

The presumption in the Pen-statement on yesterday's test: tagon is that Red China intends to put H-bombs atop missiles. This threat is the Johnson Administration's declared rationale for constructing the Sentinel ABM (antiballistic mişşile) defense around the United States.

[China has refused to join the United States, the Soviet Union and other nations in signing the nuclear test ban the same as the sixth Chinese testing of nuclear weapons.]

There has been speculation

moil was interfering with the Tse tung's 75th birthday gon has been expecting tests nuclear program. Also, China's Thursday. last nuclear test on Dec. 24, 1967, was read in the West as

But yesterday's explosion indicates the Chinese nuclear weapons drive is back on the track. The big-bang device — about three times the yield of dropped from an airplane and the H-bombs atop USAF Minexploded high above the earth uteman ICBMs-may indicate This method would tell the that China, like Russia, is Chinese how the device would going in for large city-busting

The Atomic Energy Commission limited itself to this

"The U.S. Attomic Energy Commission announced today the detection of a Chinese Communist nuclear test. which took place in Lop Nor area at 2:30 a.m. (EST) Dec. 27. This is the eighth Chinese Communist atmospheric nuclear test detected by the U.S. about three megatons, about was dropped from an airplane. 1967."
